

Transocean Once Again Included in Top 100 Best Places to Work in IT

June 18, 2012

For the third year in a row, Transocean's IT organization was listed in *Computerworld*'s best places to work in IT.

"*Computerworld*'s latest recognition of our IT team and culture is especially rewarding when you consider this is our third year in a row to receive this honor," said John Truschinger, Senior Vice President, Support Services and CIO. "The organizations honored as Best Places to Work are vastly different in many ways, but they tend to share an ability to keep their most productive people on board. We are aligned with our company's vision regarding our focus on our People, Customers, and Execution. Our ability to retain top talent is one of the main reasons we are successful. Our superb IT management team and staff make Transocean a great place to work, and our philosophy that our staff has a career at Transocean and not just a job truly makes a difference. I am proud to be part of Transocean and this remarkable IT team."

Transocean's IT team is responsible for planning, developing and supporting the company's IT infrastructure, applications and IT-related services.

"The organizations on this year's Best Places to Work in IT list consistently seek out and hire the most talented IT people, offer them competitive pay and provide great benefits," said Scot Finnie, editor in chief of *Computerworld*. "Many of these organizations have spent years building top-notch IT workplaces, and we applaud the amazing work they've done to sustain dynamic environments where IT professionals can work with the latest technologies and play a key role in business-critical projects."

About the Best Places to Work in IT

The Best Places to Work in Information Technology (IT) list is an annual ranking of the top 100 work environments for technology professionals by IDG's *Computerworld*. The list is compiled based on a comprehensive questionnaire regarding company offerings in categories such as benefits, diversity, career development, training and retention. In addition, *Computerworld* conducts extensive surveys of IT workers, and their responses factor heavily in determining the rankings.

About Transocean

Transocean is a leading international provider of offshore contract drilling services for oil and gas wells. We own or have partial ownership interests in and operate a fleet of 130 mobile offshore drilling units consisting of 50 High-Specification Floaters (Ultra-Deepwater, Deepwater and Harsh-Environment semisubmersibles and drillships), 25 Midwater Floaters, 10 High-Specification Jackups, 44 Standard Jackups and one swamp barge. In addition, we have two Ultra-Deepwater Drillships and three High-Specification Jackups under construction. The company specializes in technically demanding sectors of the global offshore drilling business with a particular focus on deepwater and harsh environment drilling services. We believe we operate one of the most versatile offshore drilling fleets in the world.
